CIVIL AND ENVIRONMENTAL ENGINEERING (CEE)

Subject-area course lists indicate courses currently active for offering at the University of Louisville. Not all courses are scheduled in any given academic term. For class offerings in a specific semester, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm).

500-level courses generally are included in both the undergraduate- and graduate-level course listings; however, specific course/section offerings may vary between semesters. Students are responsible for ensuring that they enroll in courses that are applicable to their particular academic programs.

Course Fees
Some courses may carry fees beyond the standard tuition costs to cover additional support or materials. Program-, subject- and course-specific fee information can be found on the Office of the Bursar website (https://louisville.edu/bursar/tuitionfee/university-fees/).

---

CEE 503. Fundamentals of Engineering Exam Review 2 Units
Grading Basis: Pass/Fail
Term Typically Offered: Fall, Spring, Summer
Prerequisite(s): 4th-year standing.
Description: Review of topics covered on eight-hour NCEES Fundamentals of Engineering examination. Not to be counted towards meeting the requirements for a degree.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

CEE 520. Design of Structural Systems 3 Units
Term Typically Offered: Fall, Spring, Summer
Prerequisite(s): CEE 421, CEE 422, and CEE 452.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

CEE 522. Fundamentals of Prestressed Concrete 3 Units
Term Typically Offered: Fall, Spring, Summer
Prerequisite(s): CEE 322 and CEE 421.
Description: Introduction to pre-tensioned and post-tensioned prestressed concrete. Design of precast concrete slabs, buildings, and bridges in accordance with ACI specifications and the Prestressed Concrete Institute (PCI) recommended practices. Application of computer programs for member analysis and design.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

CEE 523. Timber Design 3 Units
Term Typically Offered: Fall, Spring, Summer
Prerequisite(s): CEE 254 or consent of instructor.
Description: Concepts of Structural Timber design will be taught. The properties of wood materials will be reviewed and the procedures for the design of typical timber components will be presented. In addition to course assignments, and tests, required of all students, students taking this course for graduate credit will be required to complete a group design of a simple building.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

CEE 524. Bridge Design 3 Units
Term Typically Offered: Summer Only
Description: This class offers detailed coverage of engineering basics for the design of short- and medium-span bridges.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

CEE 530. Construction Materials 3 Units
Term Typically Offered: Spring Only
Prerequisite(s): CEE 254 and CEE 255.
Description: Properties of construction materials such as cement, concrete, asphalt, and structural elastomers. Design of Portland cement concrete and asphaltic concrete mixes.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

CEE 532. Experimental Stress Analysis 3 Units
Term Typically Offered: Fall, Spring, Summer
Prerequisite(s): CEE 530.
Description: Fundamentals of experimental stress analysis, brittle coating, photoelastic coating, and electrical strain gage techniques, strain measurements under static and dynamic loading.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

CEE 540. Construction Management 3 Units
Term Typically Offered: Fall Only
Description: This course discusses construction management including estimating, bidding, time/cost management, provisions, surety bonds, ownership, and project scheduling. Other topics, such as temporary erosion control and plan & print reading will also be covered.
Note: This section is restricted to students with a major in the department.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>CEE 627</td>
<td>Non-Destructive Testing</td>
<td>3 Units</td>
<td>Graduate/Professional standing.</td>
<td>Introduce different non-destructive testing methods for quality evaluation of concrete. Penetration resistance methods, resonant frequency methods, ultrasound pulse velocity, maturity technique will be covered. Ground penetrating radar. For class offerings for a specific term, refer to the Schedule of Classes.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>CEE 650</td>
<td>Measurement of Soil Properties</td>
<td>3 Units</td>
<td>CEE 450.</td>
<td>Laboratory testing of soil mechanical properties; index testing; testing for permeability, compressibility, and shear strength. For class offerings for a specific term, refer to the Schedule of Classes.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>CEE 653</td>
<td>Design of Earth Structures</td>
<td>3 Units</td>
<td>CEE 450.</td>
<td>Introduce different non-destructive testing methods for physical properties of intact rock; mechanical properties of rock masses, emphasis on practical applications. Rock blasting. Tunneling. For class offerings for a specific term, refer to the Schedule of Classes.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>CEE 654</td>
<td>Rock Mechanics</td>
<td>3 Units</td>

<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>CEE 656</td>
<td>Geotechnical Earthquake Engineering</td>
<td>3 Units</td>
<td></td>
<td>This course is an introduction to the problems that engineers face in earthquake prone regions. It is an &quot;interdisciplinary&quot; course in the sense that it covers topics from geology, geophysics, structural and geotechnical engineering, and probability. Emphasis in the course is given to two main issues: (1) assessment of design motion at a site, and (2) evaluation of the effects of this motion on geotechnical/structural systems. For class offerings for a specific term, refer to the Schedule of Classes.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>CEE 660</td>
<td>Transportation Planning and Urban Development</td>
<td>3 Units</td>
<td>CEE 460.</td>
<td>Focuses on the principles of transportation planning in the urban environment, including land use planning, with emphasis on the orderly development of the transportation system. For class offerings for a specific term, refer to the Schedule of Classes.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
CEE 661. Environmental Analysis of Transportation Systems  
Description: An examination of the various impacts that transportation systems and projects may have on the natural and human environment. A detailed review and application of transportation noise analysis.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)  

CEE 662. Airport Planning & Design  
Prerequisite(s): CEE 460.  
Description: The principles of location, planning, design, and evaluation of airports are examined from the engineering perspective. In addition, laws and regulations concerning airports and the aviation system are thoroughly studied.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)  

CEE 663. Advanced Traffic Operations  
Term Typically Offered: Spring Only  
Description: This course has an emphasis on capacity analysis and using computer techniques to solve traffic problems.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)  

CEE 664. Fundamentals of Intelligent Transportation Systems  
Description: Examines the elements of traffic flow theory, incident/emergency management, dynamic route guidance, in-vehicle systems, and traffic signal systems.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)  

CEE 665. Pavement Design  
Prerequisite(s): CEE 450 and CEE 460.  
Description: Design of flexible and rigid pavements, base courses, and subgrades. Effects of loading on pavement life. Investigation of pavement distress and rehabilitation. Introduction to pavement management systems.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)  

CEE 670. Advanced Hydraulics  
Prerequisite(s): CEE 370.  
Description: Dimensional analysis; integral form of the equations of motion; shear stress distribution; turbulence and boundary layer theory; concepts in particle drag and settling.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)  

CEE 671. Stochastic Processes in Hydrology  
Description: Basic concepts and classification of stochastic processes with emphasis on hydrologic systems; analysis of hydrologic time series; models for stationary hydrologic stochastic processes.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)  

CEE 672. Statistical Methods in Water Resources  
Prerequisite(s): IE 360.  
Description: Applications of advanced concepts of probability and statistics in hydrology and water resources including frequency analysis and regionalization; parameter estimation; analysis of variance and multiple regression techniques.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)  

CEE 673. Advanced Hydrology  
Prerequisite(s): CEE 470 and IE 360.  
Description: Advanced concepts for studying hydrologic processes; theory of linear hydrologic systems; conceptual models for modeling watershed rainfall-runoff response including geomorphological approaches.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)  

CEE 674. Water Resources Systems  
Description: Application of systems analysis techniques in the planning and design of water resources projects; mathematical optimization; simulation and risk-based decision-making.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)  

CEE 675. Surface Water Quality Modeling  
Prerequisite(s): Consent of instructor.  
Description: Modeling, design and control of water quality in river, lake, and estuary systems; dissolved oxygen and toxic substance models; and lake eutrophication.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)  

CEE 676. Sediment Transport and River Mechanics  
Prerequisite(s): CEE 370.  
Description: Sediment transport theory; overland erosion; alluvial streams; analysis, prediction, and control of river characteristics; local scour at river structures.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)  

CEE 677. Groundwater Modeling  
Description: Mathematical and numerical modeling of groundwater and pollution transport.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)
CEE 680. Civil Engineering Capstone Design 3 Units
Prerequisite(s): Restricted to CEE Master of Engineering students (SP).
Description: A capstone Civil & Environmental Engineering course to include elements of geotechnical, structural, transportation, and water resources engineering in a comprehensive design project.
Course Attribute(s): CBL - This course includes Community-Based Learning (CBL). Students will engage in a community experience or project with an external partner in order to enhance understanding and application of academic content.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

CEE 681. Green Engineering & Sustainable Design 3 Units
Description: Understand the origins and applicability of sustainable design and green engineering. Ultimately, be able to apply fundamental engineering concepts to these practices.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

CEE 690. Master of Science Thesis in Civil Engineering 1-6 Units
Description: Experimental and/or theoretical research to be presented in thesis for degree requirement.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

CEE 693. Independent Study in Civil Engineering 1-6 Units
Description: Independent study in a selected subject area with approval and supervision by a faculty member.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

CEE 694. Special Topics in Civil Engineering 1-6 Units
Description: An examination of one or more specified areas of Civil Engineering. Topics vary; details announced each semester.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

CEE 697. Master of Engineering Thesis in Civil Engineering 1-6 Units
Prerequisite(s): Permission of dissertation director.
Description: Original research activity in an appropriate civil engineering discipline, under the direction of a Civil Engineering graduate faculty member.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

CEE 698. Civil Engineering PhD Seminar 3 Units
Grading Basis: Pass/Fail
Prerequisite(s): Permission of the chair.
Description: Current literature in the field of civil engineering; extensive student presentations on research projects with interaction and feedback from students and faculty; guest speakers.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

CEE 699. Civil Engineering PhD Research 1-18 Units
Prerequisite(s): Permission of dissertation director.
Description: Original research activity in an appropriate civil engineering discipline, under the direction of a Civil Engineering graduate faculty member.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)
