MATH 501. Introduction to Analysis I - CUE 3 Units
Term Typically Offered: Fall, Spring
Prerequisite(s): MATH 301, MATH 311 and MATH 325.
Description: Foundations of the real number system, sequences and series, topology of the line, continuity, differentiation of functions of one variable.
Course Attribute(s): CUE - This course fulfills the Culminating Undergraduate Experience (CUE) requirement for certain degree programs. CUE courses are advanced-level courses intended for majors with at least 90 earned credits/senior-level status.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 502. Introduction to Analysis II 3 Units
Term Typically Offered: Spring Only
Prerequisite(s): MATH 501.
Description: Riemann integration on the line, sequences and series of functions, uniform convergence, metric spaces.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 505. Introduction to Partial Differential Equations 3 Units
Term Typically Offered: Fall, Summer
Prerequisite(s): MATH 301 and MATH 405 or PHYS 350.
Description: Techniques for solving standard heat, wave, and potential equations, including discussion of Fourier analysis techniques.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 507. Fourier Analysis 3 Units
Term Typically Offered: Spring Only
Prerequisite(s): MATH 301 and MATH 405.
Description: Introduction to Fourier series and transforms.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 511. Complex Analysis I 3 Units
Term Typically Offered: Occasionally Offered
Prerequisite(s): MATH 301 or ENGR 201; MATH 311; MATH 325 or ENGR 330.
Description: Geometry of the complex plane, analytic and meromorphic functions, linear fractional transformations. Cauchy’s Theorem and the Residue Theorem. Emphasizes computational aspects of the course topics.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 512. Complex Analysis II 3 Units
Prerequisite(s): MATH 511.
Description: A continuation of MATH 511, including deeper properties of analytic, meromorphic, harmonic functions and conformal mappings. Emphasizes theoretical aspects of the course topics.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 520. Theory of Numbers 3 Units
Prerequisite(s): MATH 206 or ENGR 102; MATH 311; MATH 325 or consent of instructor.
Description: A study of the integers and their divisibility properties. Particular emphasis on the theory of congruencies, partitions, prime numbers, Diophantine analysis and quadratic residues.
Note: Credit may be applied towards the MAT but not toward any other graduate degree in mathematics.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 521. Modern Algebra I - CUE 3 Units
Term Typically Offered: Fall, Spring
Prerequisite(s): MATH 206 or ENGR 102; and MATH 311; and MATH 325; or consent of instructor.
Description: An introduction to the theory of groups, rings, integral domains, and fields.
Course Attribute(s): CUE - This course fulfills the Culminating Undergraduate Experience (CUE) requirement for certain degree programs. CUE courses are advanced-level courses intended for majors with at least 90 earned credits/senior-level status.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 522. Modern Algebra II 3 Units
Term Typically Offered: Spring Only
Prerequisite(s): MATH 521.
Description: Continuation in greater depth of topics introduced in MATH 521; introduction to theory of ideals, field extensions, and abstract vector spaces.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)
MATH 535. Modeling I
Prerequisite(s): MATH 325 or MATH 405 or equivalent.
Description: Introduction to mathematical modeling of discrete and continuous dynamical systems.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 536. Modeling II
Prerequisite(s): MATH 535.
Description: Advanced mathematical modeling of discrete and continuous dynamical systems.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 545. Introduction to Fractal Geometry
Prerequisite(s): MATH 301 and MATH 325; MATH 501 recommended.
Description: Recursively defined sets and self-similarity; metric spaces and iterated function systems; topological, fractal, and Hausdorff dimensions.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 550. Advanced Euclidean Geometry
Term Typically Offered: Occasionally Offered
Prerequisite(s): A year of high school geometry; MATH 206 or ENGR 102; MATH 311; MATH 325 or consent of instructor.
Description: Theory of Euclidean geometry contrasted with non-Euclidean from both the axiomatic and algebraic approach. Of special value to secondary teachers.
Note: Credit may be applied toward the MAT but not toward any other graduate degree in mathematics.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 551. Geometry
Term Typically Offered: Spring Only
Prerequisite(s): MATH 206 or ENGR 102; MATH 311; MATH 325 or consent of instructor.
Description: Study of projective spaces, transformations and invariants. Introduction to related geometries, such as affine, elliptic, and hyperbolic.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 561. Probability
Term Typically Offered: Fall, Spring
Prerequisite(s): MATH 301.
Description: Probability spaces, probability distributions, moments, moment-generating functions, independence, transformation of variables, sampling distributions, laws of large numbers, central limit theorem, applications.
Note: Credit will not be granted for both MATH 561 and IE 360.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 562. Mathematical Statistics
Prerequisite(s): MATH 561.
Description: Random samples and statistics, point estimation, sufficiency and completeness, confidence regions, classical theory of hypothesis testing, linear regression, nonclassical procedures.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 564. Probability Models
Prerequisite(s): MATH 561.
Description: Finite probability models, Markov chains, renewal and reliability theory, Brownian motion, stochastic differential equations.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 570. Foundations of Actuarial Science
Prerequisite(s): MATH 561.
Description: Fundamental mathematical tools for quantitatively assessing risk. Application of these tools to problems encountered in actuarial science is emphasized. Covers the material of Examination 1 of the Society of Actuaries and Casualty Actuarial Society.
Note: Credit may not be applied toward a graduate degree in mathematics.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 573. Actuarial Models I
Term Typically Offered: Occasionally Offered
Prerequisite(s): MATH 570; MATH 372 or MATH 572.
Description: This course covers the material for the Society of Actuaries Exam MFE, Actuarial Models-Financial Economics (also CAS Exam 3F). The syllabus for Exam MFE develops the student’s knowledge of the theoretical basis of financial models and the application of those models to insurance and other financial risks. A thorough knowledge of calculus, probability and interest theory is assumed. In addition, for Exam MFE/3F, students are assumed to be familiar with derivative securities (introductory material).
Note: Knowledge of risk management at the level of MATH 570 is assumed.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

</tbody>
</table>
MATH 622. Algebra II
Prerequisite(s): MATH 621.
Description: Including Polynomial Rings, Modules, Vector Spaces, Structure of Fields, Galois Theory, Advanced Linear Algebra.
Note: A continuation of MATH 621.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 631. Group Theory
Prerequisite(s): MATH 522.
Description: Abstract Groups, Homomorphisms, Permutation Groups, Abelian Groups, Simple Groups, Sylow Theory, Series, Extensions.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 633. Rings and Ideals
Prerequisite(s): MATH 522.
Description: Ideals and Homomorphisms, Prime Ideals and the Prime Radical, Rings of Endomorphisms, the Jacobson Radical.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 635. Mathematical Modeling I
Prerequisite(s): MATH 325, MATH 405 or equivalent.
Description: Introduction to mathematical modeling of continuous and discrete dynamical systems.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 636. Mathematical Modeling II
Prerequisite(s): MATH 635.
Description: Advanced mathematical modeling of discrete and continuous dynamical systems.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 641. Topology I
Prerequisite(s): MATH 502 or MATH 541.
Description: Continuous functions, connectedness, compactness, countability, separation, metrizability, and completeness in the context of topological spaces.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 642. Topology II
Prerequisite(s): MATH 641.
Description: Introduction to algebraic topology, including the Fundamental Group and Covering Spaces.
Note: A continuation of MATH 641.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 663. Theory of Probability I
Prerequisite(s): MATH 501 and MATH 561 or consent of department.
Description: Advanced topics in probability theory such as probability measures, random variables, laws of large numbers, large deviations, expected values, and distributions.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 664. Theory of Probability II
Prerequisite(s): MATH 663 or consent of department.
Description: Advanced topics in probability theory such as types of convergence, central limit theorems, conditional probabilities and expectations, stochastic processes, martingales, and Brownian motion.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 667. Statistical Inference
Prerequisite(s): MATH 561 or consent of department.
Description: Advanced topics in mathematical statistics such as sampling distributions, exponential families, sufficiency, point and interval estimation, likelihood-based inference, hypothesis testing, Bayesian inference, statistical decision theory, and asymptotic theory.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 668. Linear Statistical Modeling
Prerequisite(s): MATH 667 or consent of department.
Description: This course covers linear and related models including a discussion of fixed, mixed, and random effects models as well as regression and ANOVA models. The discussion will include estimation, hypothesis testing, confidence intervals, model fitting, and model diagnostics. Violations of the assumptions of the linear model will be examined. Statistical software will be used frequently. A strong background in linear algebra is needed.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 670. Introduction to the Stochastic Calculus
Prerequisite(s): MATH 660 or consent of the department.
Description: Levy Process, local martingale, stochastic integrals, quadratic variation, Ito’s formula, existence and uniqueness of stochastic differential equation. Applications to financial engineering, no arbitrage and martingale measure, Black-Scholes model, edging.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 673. Actuarial Models I
Prerequisite(s): MATH 570 and MATH 572.
Description: Theoretical basis of actuarial models and the application of those models to insurance and other financial risks. The following specific models are introduced: Contingent Payment Models, Survival Models, Frequency and Severity Models, Compound Distribution Models, Stochastic Process Models, Ruin Models. Together with its continuation, MATH 674, covers the material on the Examination 3 of the Society of Actuaries and the Casualty Actuarial Society.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)
MATH 674. Actuarial Models II  
3 Units  
Prerequisite(s): MATH 673.  
Description: It further develops knowledge of the theoretical basis of actuarial models and the application of those models to insurance and other financial risks. The following specific models are introduced: Contingent Payment Models, Survival Models, Frequency and Severity Models, Compound Distribution Models, Stochastic Process Models, Ruin Models. Together with its predecessor, Mathematics 673, covers material on the Examination 3 of the Society of Actuaries and the Casualty Actuarial Society.  
Note: Continuation of Math MATH 673.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 676. Actuarial Modeling I  
3 Units  
Prerequisite(s): MATH 676 and MATH 674.  
Description: Approximately half of the material on the Society of Actuaries/Casualty Actuarial Society examination 4, Actuarial Modeling. Topics include: statistical analysis of simulated data, statistical validation techniques, actuarial credibility, empirical estimation, loss distributions, and introduction to estimation of survival functions. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 677. Actuarial Modeling II  
3 Units  
Prerequisite(s): MATH 676.  

MATH 681. Combinatorics and Graph Theory I  
3 Units  
Prerequisite(s): MATH 521, or MATH 580, or MATH 581, or consent of department.  
Description: Fundamental topics in Graph Theory and Combinatorics through Ramsey theory and Polya’s theorem respectively. Motivation will be through appropriate applications. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 682. Combinatorics and Graph Theory II  
3 Units  
Prerequisite(s): MATH 681.  
Description: Fundamental topics in Graph Theory and Combinatorics through Ramsey theory and Polya’s theorem respectively. Motivation will be through appropriate applications. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 683. Advanced Combinatorics and Graph Theory I  
3 Units  
Prerequisite(s): MATH 681.  
Description: Advanced topics in Combinatorics and Graph Theory, including finite planes, coding theory, combinatorial optimization, groups, graphs, and graphs on manifolds. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 684. Advanced Combinatorics and Graph Theory II  
3 Units  
Prerequisite(s): MATH 681 and MATH 682.  
Description: Course extends the study of advanced topics in Combinatorics and Graph Theory, including Extremal Graph Theory and Algebraic Combinatorics. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 687. Seminar on Discrete Mathematics  
3 Units  
Prerequisite(s): MATH 683 or consent of department.  
Description: Advanced topics in discrete mathematics. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 690. An Overview of Mathematics  
3 Units  
Prerequisite(s): Undergraduate mathematics major or at least four mathematics courses in the graduate program or consent of instructor.  
Description: History of mathematics, survey of the major content areas of modern mathematics, discernment of current directions in various mathematical fields. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 691. Independent Study  
3 Units  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 693. Seminar in Teaching Mathematics  
2 Units  
Prerequisite(s): Must be admitted to a graduate program in the Department of Mathematics and consent of instructor.  
Description: Topics in teaching mathematics to college students.  
Note: Does not count as part of the 18-hour minimum in mathematics for the MA in Mathematics. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 694. Graduate Internship  
1-6 Units  
Description: Students participating in a graduate internship must be registered for this course. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 695. Thesis Guidance  
1-6 Units  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)
MATH 696. Computer in Teaching Science and Mathematics  3 Units
**Prerequisite(s):** One year of teaching experience or consent of instructor (no previous computer experience needed).
**Description:** Introductory programming and use of computers in a wide range of topics in secondary school science and mathematics.
**Note:** Does not count as part of 15-hour minimum in 600-level mathematics courses for the MA in Mathematics.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 699. Seminar  1-12 Units
**Description:** Topics vary.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 700. Doctoral Research  1-6 Units
**Grading Basis:** Pass/Fail
**Prerequisite(s):** Student must have passed all qualifying examinations and have a dissertation committee.
**Description:** Research while enrolled for a doctoral degree under the direction of faculty members.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

MATH 710. Doctoral Dissertation  1-6 Units
**Grading Basis:** Pass/Fail
**Prerequisite(s):** Previous enrollment in MATH 700.
**Description:** Dissertation writing under the direction of the major professor.
**Note:** Grade to be deferred until evaluation of the dissertation by the student's committee.
**Note:** Graded pass-fail, depending on the evaluation by the student's committee.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)
