Applicants must meet Graduate School admission requirements along with additional program requirements.

Applicants must, as a minimum, have completed a bachelor's degree in Engineering or Medical Physics from an accredited program with a 3.25 cumulative grade point average to be considered for admission. The ideal applicant will have completed a master's degree in engineering (MS or MEng) at the time of application.

Applicants must submit an online application (http://louisville.edu/graduate/apply), including the following:

1. Official transcripts of all college-level courses
2. Three letters of recommendation
3. A written statement by the applicant describing previous experience related to bioengineering
4. A statement as to how the PhD ISSTBE will allow them to fulfill their career goals as identified by their focus area of interest
5. Official Graduate Record Exam (GRE) verbal, quantitative, and writing assessment-analytical scores. Competitive scores on the verbal and quantitative sections will be required for admission.
6. Students whose native language is non-English or degree is from a non-US accredited institution are required to submit TOEFL scores (administered by the Educational Testing Service). A minimum TOEFL score of 79 or higher on the internet-based test or 550 or higher on the paper-based test is required. Alternatively, a minimum of 6.5 on the International English Language Testing System will be accepted.

Program Requirements
To earn the Doctor of Philosophy in Interdisciplinary Studies with a specialization in Translational Bioengineering (ISSTBE), students are required to successfully complete the following:

- 47 credit hours of course work beyond their bachelor’s degree (18 Core credit hours, nine (9) Concentration credit hours, 20 Specialization credit hours)
- Participate in the Bioengineering Seminar Series (75 percent attendance rate and 1 presentation/term as a Doctoral Candidate)
- Pass the Comprehensive Examination
- Successfully defend a dissertation (15 credit hours)
- Submit two or more peer-reviewed journal papers representing their original dissertation research

Specialization Area Guided Electives

Courses in Specialization must be unique from those taken to fulfill the Concentration Requirement, and must follow either Track A, B or C below. Students must work with their advisor to establish a Plan of Study for Specialization Courses. All Specialization courses must be approved by the student’s advisor prior to registration.

Track A
Traditional Bioengineering Research PhD: 18 credit hours from those listed below with a minimum of six (6) credit hours in engineering courses + Teaching Practicum (two (2) credit hours).

Track B
Clinical-Translation Research PhD: 12 credit hours from list below designated as BIOC, ASNB, PSYC, BIOL, MBIO, OBIO, OBIO or EXP; remaining six (6) credit hours from BE, CECS, ECE, IE, or ME + Clinical Practicum (two (2) credit hours).

Track C
Advancing Bioengineering Technologies through Entrepreneurship PhD: 12 credit hours from list below designated as ENTR or IMBA, remaining six (6) credit hours from BE, CECS, ECE, IE, or ME + Teaching Practicum (two (2) credit hours).

Specialization Area Elective Coursework (see below) 20
Minimum Total Hours 47

Bioimaging and Biocomputational Modeling
BE 542 Medical Image Computing
BE 540 Machine Learning in Medicine
BE 685 Computational Methods for Medical Image Analysis
CECS 622 Simulation and Modeling of Discrete Systems
CECS 627 Digital Image Processing

Bioelectrical and Biomedical Devices
BE 524 LabVIEW for Bioengineers
BE 581 Advanced Computer Aided Design and Manufacturing for Bioengineers
BE 611 Cardiovascular Dynamics
BE 650 Advanced Biomaterials
BE 683 Artificial Organs
BE 680 Bio-Micro
ECE 543 Fundamentals of Microfabrication and MEMS
ME 640 Optimum Design Methods
ME 647 Advanced Design Methods

Biomechanics and Rehabilitation
BE 630 Biomechanical Computer Modeling and Simulation of Human Movement
ME 651 Kinematics and Kinetics of Human Movement
BE 611 Cardiovascular Dynamics
BE 639 Injury Biomechanics
BE 658 Rehabilitation Engineering and Assistive Technology
ME 650 Biofluid Mechanics
ME 652 Advanced Human Biodynamics
ME 638 Computational Methods in Fluid Flow and Heat Transfer

Specialization Area Elective Coursework (see below) 20
Minimum Total Hours 47

Code | Title | Hours
--- | --- | ---
ASNB 614 | Molecular Neuroscience | 4
BE 522 | Biomedical Acoustics | 3
BE 540 | Machine Learning in Medicine | 3
BE 551 | Gene and Drug Delivery | 3
BE 552 | Introduction to Tissue Engineering | 3
BE 553 | Nanoscale Bioengineering: Application and Methodology of Nanobiomaterials in Bioengineering | 3
BE 542 | Medical Image Computing | 3
ASNB 602 | Fundamentals of Neuroscience | 4
BE 524 | LabVIEW for Bioengineers | 3
BE 581 | Advanced Computer Aided Design and Manufacturing for Bioengineers | 3
BE 630 | Biomechanical Computer Modeling and Simulation of Human Movement | 3
ASNB 617 | Seminar on Developmental Neurobiology | 3
BE 600 | Advanced Topics in Bioengineering | 1-6
BE 605 | Tissue & Molecular Biology Techniques Laboratory | 3
BE 611 | Cardiovascular Dynamics | 3
BE 639 | Injury Biomechanics | 3
BE 640 | Computational Methods for Medical Image Analysis | 3
BE 650 | Advanced Biomaterials | 3

BE 658 | Rehabilitation Engineering and Assistive Technology | 3
BE 680 | Bio-Micro | 3
BE 683 | Artificial Organs | 3
BE 692 | Bioengineering Clinical Rotation | 2
BE 693 | Independent Study in Bioengineering | 1-6
BIOC 611 | Advanced Techniques in Biochemistry and Molecular Biology | 4
BIOC 645 | Advanced Biochemistry I | 4
BIOC 668 | Molecular Biology and Genetics | 4
BIOC 680 | Biomolecular Interactions | 2
CECS 622 | Simulation and Modeling of Discrete Systems | 3
CECS 627 | Digital Image Processing | 3
CECS 628 | Computer Graphics | 3
CECS 633 | Computer Vision | 3
CECS 660 | Introduction to Bioinformatics | 3
ECE 520 | Digital Signal Processing | 3
ECE 521 | Digital Signal Processing Laboratory | 1
ECE 523 | Introduction to Biometrics | 3
ECE 543 | Fundamentals of Microfabrication and MEMS | 3
Dissertation Committee

By the end of the first semester, it is expected that the student has identified their Dissertation Chair. After the first year of study, the student (under the guidance of his or her advisor) must select a Dissertation Committee of five or more persons, for approval by the Program Director. The committee must consist of the student’s advisor from the Department of Bioengineering (who will act as the Dissertation Committee Chair), at least two additional faculty members from within the Department of Bioengineering, at least one faculty member from a partnering School or College, and at least one additional faculty member from outside the Department of Bioengineering.

Qualifying Examination

The PhD Qualifying Examination will be offered once per year and is to be taken by students upon completion of Core courses (with the exception of Bioengineering Seminar credits) and Concentration Area courses. The Qualifying Examination includes written and oral components. The written portion of the exam gauges student competency in fundamental bioengineering topics covered in their courses. ISSTBE affiliated faculty will submit and grade questions in their respective areas of expertise for the written portion of the Qualifying Examination. The oral portion of the examination is a formal presentation comprised of the student’s critique of a peer-reviewed journal paper selected from the student’s area of concentration, delivered to the ISSTBE Program Director and a subset of faculty with expertise in the respective concentration having Graduate Faculty status. Students are allowed no more than two opportunities to take the Qualifying Examination (oral or written components).

Comprehensive Examination

To qualify for candidacy, students must pass the Qualifying Examination, maintain a minimum GPA of 3.0 and pass the Comprehensive Examination. The Comprehensive Examination requires the student to prepare a written dissertation research proposal (following an external funding agency format) that is presented, defended and approved by their Dissertation Committee. The Dissertation Committee approval constitutes passing both the written and oral portions of the Comprehensive Examination. The written portion is comprised of the student’s dissertation document and the oral portion consists of the student’s presentation and defense of their dissertation, including response to questions posed by their Dissertation Committee and public attendees. The Dissertation Committee will evaluate written and oral performance on the Comprehensive Examination separately as a Pass, Conditional Pass, or Fail. Students receiving a Conditional Pass must satisfactorily meet conditions set forth by the Dissertation Committee in order to Pass. Students failing either or both portions of the Comprehensive Examination will be permitted to repeat the respective portion(s) once.

Students must meet with their Dissertation Committee at least once per year during the remainder of their PhD program, culminating in the Dissertation Defense.
