The requirements for the Master of Science in Chemistry are as follows:

Program Information
The Department of Chemistry, in the College of Arts and Sciences, offers graduate programs leading to the Master of Science (thesis and non-thesis options) and Doctor of Philosophy degrees in chemistry with options in analytical chemistry, biochemistry, biomolecular structure and engineering, inorganic chemistry, organic chemistry, physical chemistry, and chemical physics.

The general requirements for admission to the Graduate School, (http://catalog.louisville.edu/graduate/application-admission/) for admission to candidacy, and for the master's degree can be found in specific sections of this catalog. The additional provisions listed below apply to the program leading to the Master of Science in Chemistry.

Program Requirements
The requirements for the Master of Science in Chemistry are as follows:

1. The general requirements as stated in the General Information section of this catalog.
2. Completion of course curriculum as described in the section on program requirements for the PhD degree.
3. Students with a native language other than English must show a proficiency in English. This requirement may be met with a grade of B or better in ENGL 101 (or equivalent) or an acceptable score on a standardized test (such as the TOEFL, IELTS, Duolingo or Michigan test).
4. Registration in seminar course CHEM 695 for the first three semesters of graduate study and an acceptable presentation of a one-hour literature seminar on a topic of current chemical interest or related to the student’s area of research. This seminar must be presented no later than the third semester of graduate studies.
5. Completion of a written MS thesis and an oral defense for the thesis option or completion of an original research proposal (ORP) for the non-thesis option.

Admission Requirements
Students seeking a graduate degree in chemistry should meet the following requirements:

1. Completion of the graduate application (https://louisville.edu/graduate/futurestudents/apply-materials/application/) for admission from the Graduate School and application fee.
2. A BA or BS degree in chemistry or in a related field such as physics, engineering, or mathematics. It is expected that students will have obtained a background in chemistry equivalent to 36 credit hours of undergraduate coursework. Students planning to pursue graduate study in chemical physics may substitute some of the chemistry hours with advanced courses in physics or mathematics beyond those required for a BA or BS in chemistry. Students with inadequate preparation will be required to register for specific courses in the area of deficiency. Some of these courses, subject to approval by the department, may be accepted for graduate credit. Admission to graduate study in chemical physics is made on the recommendation of the entrance committee for that option.
3. A minimum quality point standing of 3.0 on a 4.0 scale.
4. Submission of Graduate Record Examination scores (students with successful admission generally obtain quantitative and verbal scores totaling 1000 or more with an analytical score of 2.5 or totaling 900 or more with an analytical score of 3.0). Graduate Record Examination (GRE) is recommended but not required.
5. Students with a native language other than English must show a proficiency in English. This requirement may be met with a grade of B or better in ENGL 101 (or equivalent) or an acceptable score on a standardized test (such as the TOEFL, IELTS, Duolingo). A B-minus grade in ENGL 101 is unacceptable.

In individual cases, the conditional admission of a student who does not satisfactorily meet the above requirements may be recommended by the department to the Graduate School. If admission is granted, that student will be subject to those conditions specified by the department or Graduate School as being necessary to remedy the conditional admission.

Program Requirements
Master of Science (Thesis) in Chemistry
A minimum of 30 credit hours of graduate credit is required. At least 15 credit hours must be in chemistry courses. An overall GPA of 3.0 must be maintained.

Minimum Total Hours
30

1. Enrollment in the chemistry research course for the first three semesters of graduate study is required.

Chemistry Requirements

a. Courses: Students must pass a minimum of six graduate courses from at least three of six divisions (or research areas) with a minimum grade of C in any one course (a C-minus grade is considered unacceptable). The areas are: Analytical Chemistry, Biochemistry, Inorganic Chemistry, Organic Chemistry, Physical Chemistry, and Physics. An overall GPA of 3.0 or greater is required by the Graduate School. In addition, a GPA of 3.0 or greater is required in lecture courses by the department.

b. Mentor: The research mentor must be selected during the first semester. Students are required to interview a minimum of three chemistry faculty (more are recommended) and have them sign the Mentor Selection Form. The student may choose a mentor after obtaining three signatures. If the mentor agrees to accept the student, the mentor will initial the Mentor Selection Form and the

Academic Plan Code(s): CHEMMS
Master of Science (Non-Thesis) in Chemistry

A minimum total 30 credit hours of graduate credit is required. At least 15 credit hours must be in chemistry courses. An overall GPA of 3.0 must be maintained.

Minimum Total Hours: 30

1. Enrollment in the chemistry research course for the first three semesters of graduate study is required.

Note: Students in the PhD program will be awarded an MS degree (non-thesis) after successful completion of the Original Research Proposal and previous requirements.

Chemistry Requirements

a. Courses: Students must pass a minimum of six graduate courses from at least three of six divisions (or research areas) with a minimum grade of C in any one course (a C-minus grade is considered unacceptable). The areas are: Analytical Chemistry, Biochemistry, Inorganic Chemistry, Organic Chemistry, Physical Chemistry, and Physics.

b. Language: Students with a native language other than English must show a proficiency in English. This requirement may be met with a grade of B in ENGL 101 (or equivalent) or an acceptable score on a standardized test (such as the TOEFL or "Michigan test"). A B-minus in ENGL 101 is considered unacceptable.

c. Mentor: The research mentor must be selected during the first semester. Students are required to interview a minimum of three chemistry faculty (more are recommended) and have them sign the Mentor Selection Form. The student may choose a mentor after obtaining three signatures. If the mentor agrees to accept the student, the mentor will initial the Mentor Selection Form and the student should submit it for final approval by the department Director of Graduate Studies.

d. Research: Research credit will be taken through courses CHEM 691 and CHEM 692 with the graduate mentor listed as the instructor.

e. Research Proposal: The research proposal serves as the capstone project for the non-thesis MS degree. Students must develop, explain, and defend a research proposal. The proposal can be based on recent literature or the student's research project (if applicable). The student's mentor from the chemistry graduate faculty should oversee the proposal committee. The committee consists of the mentor plus two additional chemistry faculty selected by the student in consultation with the mentor.
