BIOENGINEERING (BE)

Subject-area course lists indicate courses currently active for offering at the University of Louisville. Not all courses are scheduled in any given academic term. For class offerings in a specific semester, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm).

500-level courses generally are included in both the undergraduate- and graduate-level course listings; however, specific course/section offerings may vary between semesters. Students are responsible for ensuring that they enroll in courses that are applicable to their particular academic programs.

Course Fees

Some courses may carry fees beyond the standard tuition costs to cover additional support or materials. Program-, subject- and course-specific fee information can be found on the Office of the Bursar website (http://louisville.edu/bursar/tuitionfee/).

BE 101. Introduction to Bioengineering 1 Unit
Term Typically Offered: Spring Only
Description: Survey of the field of bioengineering and introduction to art/practice of bioengineering, through a series of creative, hands-on design and reverse engineering activities. Includes problem definition/solving, decision making and team skill building.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

BE 288. Bioengineering Co-op Education Seminar 0 Units
Grading Basis: Pass/Fail
Term Typically Offered: Fall, Spring, Summer
Prerequisite(s): CHEM 202, ENGL 101, ENGR 110, student must be in Good Standing with GPA of 2.25 or higher; BE 310, BE 360.
Corequisite(s): BE 310, BE 360.
Description: Discussion of rules and regulations governing cooperative internship experience and instruction in job interviewing techniques, resume preparation and in preparation of co-op report. Required prerequisite for the first cooperative internship.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

BE 289. Bioengineering Co-op Education I 1 Unit
Grading Basis: Pass/Fail
Term Typically Offered: Fall, Spring, Summer
Prerequisite(s): BE 288.
Fee: An additional $300.00 is charged for this course.
Description: First cooperative education work term in an area directly related to the field of specialization of their degree program. Required for Professional School of Engineering students.
Course Attribute(s): CBL - This course includes Community-Based Learning (CBL). Students will engage in a community experience or project with an external partner in order to enhance understanding and application of academic content.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

BE 310. Biotransport Phenomena 3 Units
Term Typically Offered: Spring Only
Prerequisite(s): ENGR 205, ME 206, and ME 251.
Description: Introduction to fundamental concepts of momentum, heat, and mass transport with applications to biological and medical engineering science and design. Properties of biofluids. Conservation equations in integral and differential forms.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

BE 322. Circuits and Devices for Bioengineers 3 Units
Term Typically Offered: Summer Only
Prerequisite(s): ENGR 205.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

BE 340. Computational Methodologies in Bioengineering 3 Units
Term Typically Offered: Summer Only
Prerequisite(s): ENGR 205.
Description: The main goal of the course is to introduce students to high-performance computing tools which are crucial to many bioengineering and scientific applications and equip students with basic knowledge of state-of-the-art computing tools available.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

BE 354. Anatomy and Physiology 3 Units
Term Typically Offered: Spring Only
Prerequisite(s): BIOL 240.
Description: The purpose of this course is to cover the basic structure and function of the major systems of the human body.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

BE 359. Cell and Molecular Biology for Bioengineers 3 Units
Term Typically Offered: Spring Only
Prerequisite(s): BIOL 240.
Description: This course examines the fundamental principles of cell and molecular biology in humans.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

BE 360. Biomechanics Principles 3 Units
Term Typically Offered: Spring Only
Prerequisite(s): ENGR 205 and CEE 205.
Description: Introduction to the mechanical behavior of biological tissues and systems. Methods for the analysis of rigid body and deformational mechanics applied to biological tissues including bone, muscle, and connective tissues.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

</tr>
<tr>
<td>BE 450</td>
<td>Biomaterials &amp; Biocompatibility</td>
<td>3 Units</td>
<td></td>
<td>Summer Only</td>
<td>Chem 341, Me 251 and Be 360.</td>
<td>Introduces biomaterials and the clinical relevance of biomaterial performance. The course will cover polymer synthesis, characterization, mechanical testing, surface modification and biocompatibility issues, e.g. protein adsorption, immune response, and sterilization. For class offerings for a specific term, refer to the Schedule of Classes (<a href="http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm">http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm</a>)</td>
<td></td>
</tr>
<tr>
<td>BE 453</td>
<td>Introduction to Molecular Bioengineering</td>
<td>3 Units</td>
<td></td>
<td>Fall Only</td>
<td>Chem 341 and Be 359.</td>
<td>Demonstrate how molecules are used as building blocks to engineer surfaces and materials with specific attributes/function. Introduces biomimetic design principles for biomedical materials and devices to control performance/function of materials. For class offerings for a specific term, refer to the Schedule of Classes (<a href="http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm">http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm</a>)</td>
<td></td>
</tr>
<tr>
<td>BE 460</td>
<td>Biomechanics of Tissues and Organs</td>
<td>3 Units</td>
<td></td>
<td>Fall Only</td>
<td>Chem 341, Me 251 and Be 360.</td>
<td>Provide students with introductory materials for various interdisciplinary fields in biomechanics. The topics include orthopaedic biomechanics, musculoskeletal biomechanics and cardiovascular biomechanics. For class offerings for a specific term, refer to the Schedule of Classes (<a href="http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm">http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm</a>)</td>
<td></td>
</tr>
<tr>
<td>BE 480</td>
<td>Biomedical Device Design</td>
<td>3 Units</td>
<td></td>
<td>Spring Only</td>
<td>Be 423 (or concurrent) and Be 450 (or concurrent).</td>
<td>Medical device design for surgery, patient care and patient monitoring. Emphasizes design criteria and process, human factors, patient care, bench-top testing, safety, FDA regulation, market readiness and legal liability. For class offerings for a specific term, refer to the Schedule of Classes (<a href="http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm">http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm</a>)</td>
<td></td>
</tr>

</table>
BE 491. Economics, Ethics & FDA Regulations  
**Term Typically Offered:** Fall Only  
**Prerequisite(s):** BE 423 and BE 450; Senior standing in Bio-engineering.  
**Corequisite(s):** BE 497.  
**Description:** Applies methods of engineering economic analysis, ethics, and FDA regulation processes. Methods to identify, articulate and resolve ethical dilemmas intrinsic to bioengineering. Practical "hands-on" experiences in the application of economic concepts and FDA regulations.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

BE 497. Bioengineering Design Project - CUE  
**Term Typically Offered:** Fall Only  
**Prerequisite(s):** BE 354 and Senior standing in bio-engineering.  
**Corequisite(s):** BE 491.  
**Description:** Team-oriented design of a biomedical/biological mechanism, system or process satisfying a set of open-ended requirements. Written reports and oral presentations are required.  
**Course Attribute(s):** CUE - This course fulfills the Culminating Undergraduate Experience (CUE) requirement for certain degree programs. CUE courses are advanced-level courses intended for majors with at least 90 earned credits/senior-level status.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

BE 500. Special Topics in Bioengineering  
**Term Typically Offered:** Fall, Spring, Summer  
**Description:** This course will be devoted to topics that usually are not treated in detail in the general curriculum.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

BE 522. Biomedical Acoustics  
**Term Typically Offered:** Spring Only  
**Prerequisite(s):** BE 420.  
**Description:** An introduction to the fundamental principles of physical acoustics with an emphasis on biomedical applications. Major concepts covered include acoustic wave physics, transducers, and ultrasound imaging.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

BE 524. LabVIEW for Bioengineers  
**Term Typically Offered:** Fall Only  
**Prerequisite(s):** BE 340 or equivalent.  
**Description:** This course will introduce students to an intermediate level of LabVIEW (Laboratory Virtual Instrument Engineering Workbench) available from National Instruments (Austin, TX). LabVIEW is the worldwide industry standard graphical programming environment for developing data acquisition, instrument control, and industrial automation software. Students will explore core programming fundamentals common to all programming languages by using LabVIEW software to develop independent programs and data acquisition solutions using a combination of LabVIEW, data acquisition hardware, and standard test instrumentation hardware.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

BE 530. Machine Learning in Python  
**Term Typically Offered:** Fall, Spring  
**Prerequisite(s):** BE 420.  
**Description:** This course covers programming concepts in Python, machine learning concepts, and application of machine learning into biomedical and other problems using Python. Students will learn about the most applicable Python libraries that deal with different machine learning tools. Students are expected to work on a team project and write technical reports.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

BE 540. Machine Learning in Medicine  
**Term Typically Offered:** Spring Only  
**Prerequisite(s):** BE 420.  
**Description:** Topics: 1) fundamentals of medical data, 2) application of machine learning models & algorithms to medicine, 3) learning from data & classification of disorders, and 4) overview of health data, collection with sensors, body area networks, brain image data and other publicly available medical applications data. Students will learn about machine learning applications to real world medical data through examples and reading papers. Students are expected to work on a team project and write technical reports.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

BE 542. Medical Image Computing  
**Term Typically Offered:** Fall, Spring, Summer  
**Prerequisite(s):** BE 340 and BE 420.  
**Description:** Fundamentals of 2-D and 3-D image computing, application of image computing algorithms to medical images, enhancement and restoration of 2-D and 3-D medical data, and fundamentals of machine vision and medical data visualization. Students will learn image restoration, computer vision and visualization techniques with applications to medical data through examples and reading papers. Students are expected to work on a team project and write technical reports.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

BE 543. Computer Tools for Medical Image Analysis  
**Term Typically Offered:** Spring Only  
**Prerequisite(s):** BE 420.  
**Description:** This course covers: 1) Essential computer software that can be used for handling all types of medical data, 2) advanced computer software that is used for medical image analysis, such as segmentation, registration, motion correction, etc., and 3) development of comprehensive computer-aided diagnosis systems based on these ready-to-go software packages.  
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)
BE 551. Gene and Drug Delivery
Term Typically Offered: Fall Only
Prerequisite(s): BE 354 and BE 450, or graduate standing.
Description: This course covers advanced topics of gene and drug
delivery, including the physiological barriers and challenges to delivery,
biomaterials used in delivery, considerations for specificity of drug/
gene targeting, nanoscale delivery vehicles, the delivery of biologies and
vaccines, and intracellular delivery. In addition, this course integrates
literature and discussion regarding specific platform design and delivery
considerations against cancer, viral, and bacterial applications.
For class offerings for a specific term, refer to the Schedule
of Classes (http://htmlaccess.louisville.edu/classSchedule/
setupSearchClassSchedule.cfm)

BE 552. Introduction to Tissue Engineering
Term Typically Offered: Spring Only
Prerequisite(s): CHEM 341, BE 354, BE 359, and BE 450.
Description: Design, development and clinical application of tissue
engineered components, including blood vessels, bone, cartilage,
pancreas, liver and skin, for use in the human body.
For class offerings for a specific term, refer to the Schedule
of Classes (http://htmlaccess.louisville.edu/classSchedule/
setupSearchClassSchedule.cfm)

BE 553. Nanoscale Bioengineering: Application and Methodology of
Nanobiomaterials in Bioengineering
Prerequisite(s): BE 450 or BE 453 or permission of department chair.
Description: An introduction to the fundamental principles of
nanoengineering with a focus on 1) synthetic methodologies of
tailored nanobiomaterials (physical, chemical and electrochemical); 2)
nanobiomaterial characterization using advanced analytical, microscopic
and spectroscopic techniques; and 3) therapeutic and diagnostic
applications.
For class offerings for a specific term, refer to the Schedule
of Classes (http://htmlaccess.louisville.edu/classSchedule/
setupSearchClassSchedule.cfm)

BE 581. Advanced Computer-Aided Design and Manufacturing for
Bioengineers
Term Typically Offered: Fall, Spring, Summer
Prerequisite(s): BE 340 or by permission of Department Chair.
Description: An introduction to the engineering design and manufacturing
processes for bioengineering applications with an emphasis on the use of
modern computer-based analysis, design and presentation tools as well
as manufacturing techniques such as casting, machining, forming and
assembly for polymer and metal-based materials.
For class offerings for a specific term, refer to the Schedule
of Classes (http://htmlaccess.louisville.edu/classSchedule/
setupSearchClassSchedule.cfm)

BE 593. Independent Study in Bioengineering
Term Typically Offered: Fall, Spring, Summer
Prerequisite(s): Faculty consent.
Description: A theoretical or experimental investigation of a problem area
related to Bioengineering.
For class offerings for a specific term, refer to the Schedule
of Classes (http://htmlaccess.louisville.edu/classSchedule/
setupSearchClassSchedule.cfm)
