URBS 131. Introduction to Sustainability - SB  
**Term Typically Offered:** Fall, Spring, Summer  
**Description:** The interdisciplinary field of sustainability examines the environmental, political, economic, and social problems facing humans and society at local, regional and global scales. This course provides an introductory survey of the concepts, values, frameworks, and methodologies that contribute to understanding and responding to problems such as climate change, environmental degradation, and the issues of limited resource allocation. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

URBS 201. The Making of Urban Places - SB, D1  
**Term Typically Offered:** Fall Only  
**Description:** This course provides an introduction to the study of cities and urban places, through integration of the works of urban planners, sociologist, geographers, and political scientist. Topics to be covered include historical and contemporary patterns of urban growth, the social structure of cities, and suburbanization and new urbanism. The course fulfills the Cardinal Core requirement in Social & Behavioral Sciences (SB) with the U.S. Diversity credit (D1). For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

URBS 202. Discover Louisville  
**Term Typically Offered:** Fall Only  
**Description:** This course will introduce students to the urban environment of Louisville, exploring the city’s past, present, and future. Students will explore how the intertwining forces of politics, economics, social struggles, and cultural heritage shape the current spatial forms we see in the city today. Using Louisville as an urban laboratory, students will examine current socio-political and socioeconomics processes and connect these processes to the existing built environment. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

URBS 231. Environmental Management  
**Term Typically Offered:** Fall Only  
**Prerequisite(s):** URBS 131.  
**Description:** This course introduces students to major environmental problems in sustainability. Students will examine the biophysical or ecological properties, manifestations, and consequences of these problems at local, regional, and global scales. The course will take particular interest in human-environment interactions, understanding the role different ecosystems and environmental processes play in human well-being, as well as how humans interact with and influence biodiversity, structure, and function of natural systems worldwide. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

URBS 232. Behavioral Dimensions of Environmental Decision-Making  
**Term Typically Offered:** Spring Only  
**Prerequisite(s):** URBS 131.  
**Description:** This course will examine sustainability through a behavioral lens, exploring the psychological processes, primary research methods, and behavioral solutions involved in environmentally responsible behavior and sustainability. Students will be introduced to key principles of motivation, perception, and decision-making to identify fundamental behavioral obstacles to sustainability. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

URBS 301. Planning for Innovative and Equitable Cities and Regions  
**Term Typically Offered:** Fall, Spring  
**Prerequisite(s):** URBS 201.  
**Description:** This course is an introduction to urban administration. It involves the political, legal, and managerial principles that drive the development and implementation of public policy in American cities. Scholarly writing and news coverage of current events will guide our examination of the actors, institutions, and complex relationships that define the subject. As many of these concepts are illuminated by local events, where possible we will focus on Louisville. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

URBS 302. Foundations of Urban Administration  
**Term Typically Offered:** Fall Only  
**Prerequisite(s):** URBS 201.  
**Description:** This course is an introduction to urban administration. It involves the political, legal, and managerial principles that drive the development and implementation of public policy in American cities. Scholarly writing and news coverage of current events will guide our examination of the actors, institutions, and complex relationships that define the subject. As many of these concepts are illuminated by local events, where possible we will focus on Louisville. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

URBS 303. Quantitative Research Methods in Sustainability and Urban Studies - QR  
**Term Typically Offered:** Fall, Spring  
**Prerequisite(s):** ACT Math score of at least 19 or SAT Math score of at least 510 or a course indicating equivalent college math readiness.  
**Description:** This course is designed to be an elementary introduction to statistics with an additional mixture of research methods fundamentals for sustainability and urban studies. Students will learn statistical techniques for quantitative data analysis as well as a basic understanding of how research is conducted. The statistics sections covers descriptive statistics, such as measures of central tendency and variation, some probability theory, and inferential statistics, such as hypothesis testing using t-tests. The focus of the research methods section is on quantitative research, such as sampling, measurement issues or experimental approaches, as they are relevant for sustainability and urban studies. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

<td>URBS 312</td>
<td>Dogs in Society: An Interdisciplinary Examination of the Human-Canine Connection - SB</td>
<td>3</td>
<td>Fall, Spring</td>
<td>The course examines the evolution of dogs as human partners in society and delves into the relationships of our species with one another. It explores medical, safety, ethical, regulatory, and legal issues, including the American with Disabilities Act and municipal approaches to regulating ownership. It considers behavioral adaptations of both species and some cutting-edge research in canine neuroscience. (Social Science) For class offerings for a specific term, refer to the Schedule of Classes. <td>URBS 331</td>
<td>Sustainable Built Environment - D1, SB</td>
<td>3</td>
<td>Spring Only</td>
<td>The course will explore the issues of sustainability from the perspective of the built environment, our history of construction and expansion, and buildings and how they interact with the natural environment. These issues will be explored from building specific, as well as urban system, perspectives including urban design. Further, the course will focus on identifying and implementing practices that lead to more sustainable man-made modifications of natural environment for human purposes. The course will comprise of a discussion about sustainable sources for energy, water, air, materials for human habitat design and management. For class offerings for a specific term, refer to the Schedule of Classes. <tr>
<td>URBS 427</td>
<td>The Just City</td>
<td>3</td>
<td>Fall Only</td>
<td>Planners are called upon to promote equity in their work, to assure fairness in their procedures and secure justice through their plans and programs. Social and racial equity represent more than just equality but should produce societal fairness and equal opportunity. Many groups in the U.S. are marginalized by inequitable conditions, policies, and disparate outcomes. From the inner city to declining inner suburbs or impoverished rural areas, distressed, opportunity-deprived communities limit the life chances for their residents and impact everyone. The course will investigate the planning processes that have produced inequitable outcomes in communities and explore best practices for the future. Note: Cross-listed with 627. For class offerings for a specific term, refer to the Schedule of Classes. URBS 431. Policy and Governance in Sustainability - WR
Term Typically Offered: Fall Only
Prerequisite(s): URBS 231, URBS 232.
Description: The course will deal with policy making and governance, and explore the impacts of political economy on overall sustainability. Students will examine desired economic conditions, policies, and governance systems that may encourage adoption of best practices in sustainability, including city / county level policy making, state and federal level issues (e.g., EPA, renewable energy incentives), and grassroots political organizing.
Note: Approved for the Arts and Sciences upper-level requirement in written communication (WR).

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

URBS 432. Sustainable Social-Ecological Systems
Term Typically Offered: Fall Only
Prerequisite(s): URBS 231 and URBS 232.
Description: This course examines sustainability problems and processes as embedded within large social-ecological systems and societal frameworks in the U.S. and globally. Students will examine topics in sustainability from a holistic systems perspective, in which "sustainability" is seen to integrate multiple actors, social systems (e.g., culture, economy, communities, and governance), environmental processes, and built / technological infrastructures at multiple scales to archive human welfare and lasting environmental prosperity (i.e., "social-ecological sustainability").
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

URBS 440. Sustainability Internship - CUE
Term Typically Offered: Fall, Spring, Summer
Prerequisite(s): Minimum of 90 credit hours completed and approval of program director.
Description: Students are required to complete 120 hours in a sustainability-focused position for an agency or organization in the Louisville area. Typical internship mentors and sites might include local government agencies, community nonprofit organizations, local business organizations, or university partnerships. Students must get prior approval from the program director before enrolling.CUE courses are advanced-level courses intended for majors with at least 90 earned credits/senior-level status. CBL - This course includes Community-Based Learning (CBL). Students will engage in a community experience or project with an external partner in order to enhance understanding and application of academic content.
Note: CUE - This course fulfills the Culminating Undergraduate Experience (CUE) requirement for certain degree programs.
Course Attribute(s): CUE - This course fulfills the Culminating Undergraduate Experience (CUE) requirement for certain degree programs. CUE courses are advanced-level courses intended for majors with at least 90 earned credits/senior-level status.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

URBS 445. Independent Study in Sustainability - CUE
Term Typically Offered: Fall, Spring, Summer
Prerequisite(s): URBS 231, URBS 331, and consent of instructor.
Description: This course is a student-designed and faculty-supervised independent study in a sustainability-related topic. Students interested in designing an independent study course should meet with their advisor or the program director during the semester prior to that in which they propose to enroll in the course.CUE courses are advanced-level courses intended for majors with at least 90 earned credits/senior-level status.
Note: CUE - This course fulfills the Culminating Undergraduate Experience (CUE) requirement for certain degree programs.
Course Attribute(s): CUE - This course fulfills the Culminating Undergraduate Experience (CUE) requirement for certain degree programs. CUE courses are advanced-level courses intended for majors with at least 90 earned credits/senior-level status.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

URBS 490. Special Topics
Term Typically Offered: Occasionally Offered
Description: Examination of an advanced topic related to urban studies or sustainability. Topic will vary by semester offered.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

URBS 495. Independent Study
Term Typically Offered: Fall, Spring, Summer
Prerequisite(s): Minimum of 60 credit hours completed and approval of program director.
Description: This course is an independent study in an urban studies-related topic. Students interested in designing an independent study course should meet with the program director during the semester prior to that in which they propose to enroll in the course.
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

URBS 505. Urban Demography and GIS
Term Typically Offered: Spring Only
Prerequisite(s): For students enrolled in URBS 505 only: URBS 201, URBS 202, and completion of at least 60 credit hours of prior coursework; no prerequisites for students enrolled in URBS 605.
Description: This course will introduce students to geographic information systems (GIS) as an analytical tool with which to study urban demographic issues. The material will be geared towards students in the urban planning, public administration, and urban studies programs, with a focus on demographic data and issues frequently encountered by planners, policymakers, and policy analysts. Topics that will be covered include migration, housing and neighborhood development, segregation, and land use.
Note: Cross-listed with URBS 605.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)
URBS 601. Planning Theory & History 3 Units

Term Typically Offered: Fall Only

Description: This course will introduce the historic foundation of modern urban planning, and investigate the central themes in planning theory, using both historical and contemporary contexts to assist in the understanding of its role in shaping planning thought and practice. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)

URBS 627. The Just City 3 Units

Term Typically Offered: Fall Only

Description: Planners are called upon to promote equity in their work, to assure fairness in their procedures and secure justice through their plans and programs. Social and racial equity represent more than just equality but should produce societal fairness and equal opportunity. Many groups in the U.S. are marginalized by inequitable conditions, policies, and disparate outcomes. From the inner city to declining inner suburbs or impoverished rural areas, distressed, opportunity-deprived communities limit the life chances for their residents and impact everyone. The course will investigate the planning processes that have produced inequitable outcomes in communities and explore best practices for the future.

Note: Cross-listed with 627.
