**Term Typically Offered:** Fall, Spring, Summer

**Description:** A social map of the contemporary United States reveals several culturally-identified human groups based upon race, ethnicity, religion, language, family origins, and other characteristics. While diversity has become integral to the American society, it is an area that is little-studied and far less understood by many. This course will help students better understand racial and ethnic diversity in today's society. More than a historical overview, this course includes selected readings and film which provide glimpses behind the facade of the "other", to see some of the struggles they face as they become part of the American "fabric". In the process of developing this understanding, we will constantly challenge ourselves by asking two main questions: "Who is an American?" and "What does it mean to become an American?"

**PAS 247. Language, Protest and Identity - D1, SB 3 Units**

**Term Typically Offered:** Fall, Spring

**Description:** Sociolinguists see language as more than a question of people talking to each other. Language not only communicates ideas, but also communicates our identities in a society. It identifies us as we see ourselves and it identifies us, as others perceive us. Embodied in the act of human communication is a complex set of rules for how to send a message and another set of rules for how to interpret that message. Beyond these rules, socially constructed preconceptions, such as issues of race, class, and gender, can have an influence on the way people choose to communicate with others and on how that communication is understood by others. Much of this operates subtly and below our consciousness, such as when we say one thing, but our kinesics (body language) displays a different attitude. However, there are some, particularly those working in politics or advertising, who have developed a keen ability to manipulate or otherwise channel messages for a special effect. Recognizing how these various factors work, and their effect on the ability of people to understand one another, is particularly important in the current era. Societies have become more complex and diverse populations are now faced with the challenges of sharing the same living and working space. (Humanities)

**PHEP 200. Disease Detectives** 3 Units  
**Term Typically Offered:** Fall Only  
**Description:** This course covers the history of epidemics, the evolution of epidemiology, the role of public health, and concepts of disease transmission and surveillance. When an epidemic occurs within a population, public health professionals rely upon epidemiology to identify potential causes. The epidemiological approach provides public health professionals a set of tools to objectively investigate disease with regard to population, place and time. While these methods continue to evolve, epidemiology has played a constant role in improving public health for more than a century. This course will show students how the epidemiological approach has been applied to address both historical and current epidemics of infectious and chronic diseases.

The course will examine the dynamics of these outbreaks. Why do they start, what makes them take off, and why do they decline? In addition, the concept of the "syndemic", or the confluence and synergism in time and space of two or more outbreaks, will be examined.

The course uses data and perspectives from across the social sciences to develop a more realistic story—one that understands that people are not boats and the tides can alternately lift them up or beat them down, refresh them or drown them depending on the circumstances. Questions about those circumstances structure the course. Another question addressed by the course: how can knowing more about globalization and in/equality help us develop the human career in different possible directions? The readings and other materials vary greatly by period, by spatical focus, and by analytical perspective. This is a WR course because the topic demands that students learn to pose their own questions about it and to answer those questions in cogent prose.

**WGST 202. Seeing Gender: Introduction to Gender in Visual Studies - AH, D1****3 Units****Term Typically Offered:** Fall, Spring**Description:** This course introduces students to the disciplines of Visual Studies and Women's, Gender and Sexuality Studies. It explores the many ways in which these fields intersect through a consideration of two primary, related concepts: the social construction of vision and its inverse, the visual construction of the social. The first highlights how humans are conditioned to see the way they do because they are social animals. The latter underscores the fact that it is equally true that social arrangements, such as gender and race, take the forms that they do because humans are seeing animals. This framework allows students to critically engage some of the central questions that have shaped both Visual Studies and Women's, Gender and Sexuality Studies. How does seeing impose itself upon the social construction of gender and other forms of identity, such as racial and sexual identity? What is the relationship between images and words, and how does that relationship affect the politics of how images are used? What are the mechanisms by which vision and visual images become gendered or racialized? Why is visual experience so fraught with anxiety and fantasy? How do visual encounters with other people (and with images and objects) inform the construction of social life as gendered and racialized?

**WGST 508. Queer Performance** **3 Units**

**Term Typically Offered:** Occasionally Offered

**Description:** What constitutes queer performance? Is queer who you are or what you do? Is sexuality all we mean by queer? What are the historical, aesthetic, and political aspects of queer performance? Integral to our theoretical discussions will be questions of practice and production: Where is queer performance staged and how is it received? How is it produced, for whom, by whom, and with what funds? Is queer inherently or even necessarily radical? Within rigid Western notions of gender, the "Queer Performer," is a gender outlaw; an individual who pushed at the edges of gender, forcing us to recognize that gender has little to do with our biological sex. Their performances of their gender(s), race(s), and/or sexuality(ies) challenges our prevailing notions of what it means to be Queer and what it means to perform identity. This course will examine the artistic and aesthetic performances of various Queer Performers to foster an understanding and appreciation of the rich diversity of the forms of performance styles and practitioners that might be called "lesbian," "gay," "transgender," and "queer," among others. Secondly, it will motivate students to examine the broad social, political, religious, and cultural contexts in which queer performance takes place. Lastly, this course will allow students to contemplate what it means to be a spectator of performance through a queer perspective, regardless of one's identity, or sexual orientation.

**Prerequisite(s):** ARTH 270 and ARTH 325, or permission of instructor.

**Description:** Representations of Trauma in the Visual Arts is an advanced exploratory seminar examining the changing relationships between trauma and its representation in the twentieth century. Beginning with the Holocaust, the course charts a trajectory from this most profound of collective traumas, to the refinement of clinical definitions of trauma (e.g., PTSD) in the wake of the Vietnam War, the development of trauma studies in the humanities in the 1990s, to the recent "pictorial turn" within scholarship on trauma. This historical framework will be brought to bear upon the dynamics of how trauma and visibility have been approached by scientists, scholars, and artists. Each week's reading and viewing materials will offer students an example of historical or clinical account of trauma, a secondary or applied analysis, and its artist's original work that responds to the particular traumatic event under consideration.

In this regard, students will be encouraged to negotiate the discursive relationships between history, theory, and practice.
