Department: Theatre Arts (<http://www.louisville.edu/a-s/ta/>)
Program Website (<http://louisville.edu/theatrearts/undergraduates/>)
Academic Plan Code(s): TA_ _BS

Program Information

As part of the College of Arts and Sciences, the Theatre Arts is committed to a liberal arts education for our undergraduate students and professional training for graduate students. The ancient art of theatre is most fully understood and exists at its deepest form of expression through the creation of performances shared with an audience. Doing so demands a deep array of knowledge and skill combined with a professional attitude and work ethic that can serve students throughout their lives in whatever profession they pursue.

All Theatre Arts Undergraduate Majors are required to fulfill course requirements for the College of Arts and Sciences, General Education and Programmatic/Supporting Courses.

Theatre Arts Requirements are split into four core areas: Academics, Performance, Design and Technology, and Performance/Production. In addition, Theatre Arts undergraduate majors utilize 18 hours of department electives to specialize in one of five areas including African American Theatre, Performance, Design and Technology, Dramaturgy and Playwriting, and General Studies. All majors participate in the Culminating Undergraduate Experience in their final year.

Completion of this degree requires work to be submitted for the department's Learning Outcomes Measurement. For details, contact the department.

Women's, Gender and Sexuality Studies (BA)

This program was approved for students entering the university in the Summer 2020–Spring 2021 catalog year. Bachelor of Arts in Women's, Gender and Sexuality Studies

Unit: College of Arts and Sciences (AS) (<http://www.louisville.edu/a-s/>)
 Department: Women's, Gender and Sexuality Studies (<http://www.louisville.edu/a-s/ws/>)
 Academic Plan Code(s): WGSTBA, WGSTBA_0

Program Information

This program can be completed in a traditional classroom format or entirely online (https://louisville.edu/online/programs/bachelors/bachelor-of-arts-in-womens-and-gender-studies/?utm_source=uofl-catalog).

Women's, Gender and Sexuality Studies is an interdisciplinary major that draws its questions and approaches from the humanities, social sciences, natural sciences, and arts. It helps students to develop theoretical, empirical, and methodological perspectives for studying gender as a crucial category for understanding the world. We offer extremely flexible scheduling for our majors: we have three core courses, offered regularly; students are allowed a fair amount of control in selecting the classes that will be most helpful to them in their chosen career path to complete the remainder of their requirements. Our students are required to engage in service learning opportunities outside the university, giving them useful career experience. Students in our program also find it easy to double major, if they so desire.

WGST majors learn to:

1. Apply gender analytics at the micro and macro level for research and practices of social change;
2. Examine complex social problems using gender-informed analysis, research and design;
3. Select appropriate methodologies from the humanities and social sciences for analyzing data and texts;
4. Provide appropriate theoretical interpretation based on discipline-related concepts;
5. Draw conclusions based on the analyses of texts and qualitative and quantitative information;
6. Demonstrate effective written and oral communications tailored to specific audiences and contexts to increase the understanding and utilization of research findings;
7. Identify how social, cultural and scientific knowledges are produced by institutions such as academic disciplines, media, arts, and politics;
8. Understand how gender intersects with other structures of power such as race, class, sexuality, disability and other structures of power in the U.S. and globally;
9. Draw from multiple fields of study to evaluate and generate information and experiences related to gender, race, class, sexuality, disability, etc.

Completion of this degree requires work to be submitted for the department's Learning Outcomes Measurement. For details, contact the department.

Program Information

Women's, Gender and Sexuality studies is an interdisciplinary major that draws its questions and approaches from the humanities, social sciences, natural sciences, and arts. It helps students to develop theoretical, empirical, and methodological perspectives for studying gender as a crucial category for understanding the world. We offer extremely flexible scheduling for our majors: we have three core courses, offered regularly; students are allowed a fair amount of control in selecting the classes that will be most helpful to them in their chosen career path to complete the remainder of their requirements. Our students are required to engage in service learning opportunities outside the university, giving them useful career experience. Students in our program also find it easy to double major, if they so desire.

WGST Majors learn to:

1. Apply gender analytics at the micro and macro level for research and practices of social change;
2. Examine complex social problems using gender-informed analysis, research and design;
3. Select appropriate methodologies from the humanities and social sciences for analyzing data and texts;
4. Provide appropriate theoretical interpretation based on discipline-related concepts;
5. Draw conclusions based on the analyses of texts and qualitative and quantitative information;
6. Demonstrate effective written and oral communications tailored to specific audiences and contexts to increase the understanding and utilization of research findings;
7. Identify how social, cultural and scientific knowledges are produced by institutions such as academic disciplines, media, arts, and politics;
8. Understand how gender intersects with other structures of power such as race, class, sexuality, disability and other structures of power in the U.S. and globally;
9. Draw from multiple fields of study to evaluate and generate information and experiences related to gender, race, class, sexuality, disability, etc.

Completion of this degree requires work to be submitted for the department's Student Learning Outcomes Measurement. For details, contact the department.

Program Information

The College of Arts & Sciences and the Louis D. Brandeis School of Law have joined forces to create 3+3 Accelerated Law programs that allows eligible students in the College of Arts & Sciences to begin law school in their senior year of undergraduate study. Students substitute undergraduate major requirements with the first 30 hours of law school, earning an undergraduate degree after their first year of law school and a Juris Doctor (JD) degree two years later.

Completion of this degree requires work to be submitted for the department's Learning Outcomes Measurement. For details, contact the department.

Departmental Admission Requirements

Admission to the BA in Women's, Gender and Sexuality Studies requires a minimum cumulative grade point average of 2.0 and a minimum grade point average of 2.0 on courses in the major. A 3.5 GPA is recommended by the School of Law (see below).

The Application for Major form can be found on the Arts & Sciences Advising Center website (<http://louisville.edu/artsandsciences/advising/apply/>).

Admission to Law School

Admission to the 3+3 track does not guarantee admission to the law school. Students seeking admission to law school must complete a law school application and satisfy all of Brandeis' admissions requirements, including its median GPA and LSAT expectations.

It is recommended that students planning to pursue this track have a minimum cumulative GPA of 3.5.

For more information on Brandeis and its admissions requirements, please contact the Brandeis School of Law Office of Admissions (<https://louisville.edu/law/>). A visit to the law school and an opportunity to observe a class can be arranged.

Minor in Applied Statistics and Data Science

Unit: School of Public Health (<http://louisville.edu/sphis/>) & Information Sciences (<http://louisville.edu/sphis/>)
Academic Plan Code(s): ASDSMINOR

Program Information

A demonstrated working knowledge in statistical and data science methods has become a vital component for students in many disciplines such as business, journalism, natural and social sciences, political science, psychology, and public health. As evidenced by nationwide employment statistics, employment prospects, and rates, both demand and compensation for individuals with strong quantitative sciences backgrounds are much higher than graduates with minimal exposure to these areas.

The Applied Statistics and Data Science minor exposes students to several commonly applied statistical methods and data science techniques bolstering and complementing a wide variety of undergraduate majors by enhancing their career opportunities. Students in this program will be trained in data management, analysis, reasoning, and decision making using various types of data.

Admission to the minor requires completion of at least 30 hours of degree-applicable credits with a minimum cumulative GPA of 2.0. In addition, students must have taken MATH 111 (or an equivalent) or higher with a minimum grade of B-minus as part of the 30 credit hours. The minor is open to any undergraduate who meets these prerequisites, regardless of major.

Program Requirements

The program consists of three required courses and three elective courses, where one of the electives must be a Statistical Computing course (see table below). One of the required courses, PHST 301, may be substituted by an approved equivalent course from another unit.

A laptop capable of running basic statistical software is a requirement for coursework in this program.

Academic Plan Code(s): EH_ _MINOR

The Environmental Health minor is not accepting new enrollments for the 2020-2021 Academic Year.

The Environmental Health minor will expose students to basic principles of how the environment affects health, how toxic materials are distributed in the environment, how environmental agents with adverse effects on health are measured, how these agents contribute to the burden of human disease, and how regulations pertinent to environmental health are devised and promulgated. Students will develop critical thinking skills necessary to evaluate environmental hazards and exposures, assess health risks, and formulate rational policy decisions.

The Environmental Health minor can be pursued as a type of specialization within the field of public health—e.g., by Public Health majors, as adjunct preparation for other health fields, such as medicine or nursing—or as an applied field of basic science, such as biology or chemistry. The goal of the program will be to provide students with a solid foundation for further education or careers related to environmental health.

This option is for students who wish to follow a more structured and traditional university schedule while taking advantage of accelerated sessions. Two sessions will be available in Fall and Spring and one session will be available in Summer.

Students may start the program at the beginning of the Fall, Spring, or Summer terms, or before the second half-semester in Fall or Spring terms. This allows student to start the Term Option program five times per year, and enroll in half-semester session courses. All coursework in the Term-Option Pathway must be completed within the half-semester session period. Tuition and fees in Term-Option enrollments may be refunded in accordance with normal university policies.

Flex Option: This is the current pathway for students wishing to pursue the Competency-Based Education model (CBE). In Flex Option, students have 32 weeks to move through the program materials at their own pace. Many students value this level of flexibility. This path places the responsibility on the student to set and maintain their own pace to finish the materials on time. Students may enroll in additional CBE courses as soon as previously enrolled courses are completed to expedite program completion. Financial Aid is dependent on timely completion.

Students may start the program on the first Tuesday of every month (except December). Students in this program will register for all major and track courses with their assigned Success Coach. All tuition and fees for CBE courses are non-refundable when a student begins a CBE course.

The CBE course term begins with enrollment and the onset of academic activity. Flex Option/CBE courses are student self-paced, but students must complete enrolled CBE courses within 32 weeks. A student cannot withdraw from a CBE course once started.

Professional Schools

The University of Louisville includes three schools that offer professional degrees: the School of Dentistry, the Louis D. Brandeis School of Law, and the School of Medicine.

For information on pre-professional curriculum and admissions requirements of the professional schools, students should contact the Arts & Sciences Advising Center.

The School of Dentistry

In addition to an undergraduate Bachelor of Science in Dental Hygiene, the School of Dentistry offers graduate and professional degree programs. They are the Doctor of Dental Medicine (DMD), Master of Science in Oral Biology (MS), and Master of Science in Dentistry (MSD) combined with an advanced specialty certificate in endodontics, orthodontics, pediatric dentistry, periodontics, and prosthodontics.

At the time of application, DMD applicants must have a minimum of 90 college credit hours with at least 35 hours of biomedical science course work, including courses in biology, general chemistry, organic chemistry, biochemistry and physics, along with recommended coursework in microbiology, anatomy, physiology, histology and immunology.

The master's degree in oral biology program includes graduate level courses provided by graduate faculty within the School of Dentistry. This program is directed toward a general understanding of the biology of dental science. Students obtain detailed knowledge and necessary skills required to perform biologic research. For more information, see the UofL Graduate Catalog.

The School of Dentistry offers a program of study leading to the master of science degree in dentistry for postgraduate students/residents enrolled in the advanced specialty certificate programs in endodontics, orthodontics, pediatric dentistry, periodontics, and prosthodontics.

Admission Requirements

To qualify for admission, candidates must earn a baccalaureate degree from an accredited institution prior to enrollment. There is no required undergraduate major and there are no pre-requisite courses. Students are encouraged to pick a major that suits their interests and to challenge themselves academically within that major. Students should choose courses that emphasize critical thinking, analysis, writing, and communication skills. These skills are necessary for the study of law. Except as noted below, all candidates must take the Law School Admission Test (LSAT) to qualify for admission.

More detailed information about admission requirements and application procedures can be obtained at louisville.edu/law/admissions or by calling the Law School Office of Admissions (502) 852-6391.

3+3 Accelerated Law Program

The law school offers a 3+3 Accelerated Law Program for students pursuing certain undergraduate majors at the University of Louisville. Students studying Criminal Justice, History, or Women's and Gender Studies may apply to begin law school during their senior year of undergraduate study. More information can be obtained from the College of Arts and Sciences (<https://louisville.edu/artsandsciences/academics/accelerated/3plus3/>).

Interested students are encouraged to reach out to undergraduate advisors in one of the three eligible majors for more information.

Admission Without LSAT

The Brandeis School of Law may admit up to 10% of each incoming class without requiring the LSAT. Only students graduating from the University of Louisville may qualify. To qualify, a candidate must:

- Have an SAT or ACT score in the 85th percentile or higher;
- Maintain a cumulative GPA of no less than 3.5 throughout all undergraduate studies (this includes grades earned at other institutions, even if those classes were not transferred to the University of Louisville or calculated into the GPA at the University of Louisville);
- Attend the University of Louisville for a minimum of six (6) semesters (excluding winter and summer sessions) prior to graduation; and
- Not have a reportable LSAT score (i.e., has not taken the LSAT in the last five (5) years).

Interested students should contact Renée Ferrell, Assistant Dean for Admissions at the Brandeis School of Law, at renee.ferrell@louisville.edu.

The School of Medicine

Applicants to the first-year class of the University of Louisville School of Medicine are considered individually and are selected based on merit without consideration of race, religion, sex, age, or national origin. The Admissions Committee evaluates an applicant's acceptability based on the premedical record, scores on the Medical College Admission Test (MCAT (<https://students-residents.aamc.org/applying-medical-school/taking-mcat-exam/>)), recommendations from Premedical Advisory Committees, established technical standards for admissions and the applicant's personality and motivation as evaluated by interviews with members of the committee. Complete four-year college preparation is encouraged. Early decision program is encouraged for stellar applicants. Inquiries concerning admission should be addressed to:

Programs of medical education that award the degree of doctor of medicine in the United States and Canada are accredited by the Liaison Committee on Medical Education (LCME). This agency is sponsored by the Association of American Medical Colleges and the American Medical Association. The University of Louisville School of Medicine is a member of the Association of American Medical Colleges and is accredited by LCME.

Application Process: The University of Louisville School of Medicine participates in the American Medical College Application Service (AMCAS). Application materials are available by May at the AMCAS website (<https://students-residents.aamc.org/applying-medical-school/applying-medical-school-process/applying-medical-school-amcas/>).

Upon receipt of the application from AMCAS, the University of Louisville School of Medicine Office of Admissions will email additional application materials to qualified applicants. Completed secondary applications are due in the Office of Admissions by December 1. A processing fee is charged and is not refundable, nor can it be credited toward tuition

if the applicant is accepted. The fee may be waived, however, if the applicant has received a fee waiver from AMCAS. More information about the application process can be obtained at: louisville.edu/medicine/admissions (<http://louisville.edu/medicine/admissions/>).

Residence status: Although applications from nonresidents are accepted, residents of Kentucky are given preference for admission. This policy is consistent with the mission of the University of Louisville as a state university. Residency must be established prior to making application. Applications from international students, including those with "Deferred Action for Childhood Arrivals" status (DACA), are accepted. Consistent with the mission of the University of Louisville as a state university, those with significant academic, personal or family ties to Kentucky are given preference. International applicants are considered under the following circumstances:

- The applicant has a pending application for permanent residency status in the United States **and A**) is either married to a U.S. citizen who has an established residence in Kentucky and intends to remain in Kentucky, or B) has numerous members of his or her immediate family who have established residence in Kentucky indefinitely; or
- The applicant is married to the beneficiary of an approved I-140 Petition for Immigrant Worker ("I-140 spouse") and the applicant and the applicant's I-140 spouse are eligible for permanent residency except for delays stemming from backlogs in visa priority dates, and the applicant and the applicant's spouse are presently in an immigration status that is renewable until they obtain permanent residency **and A**) the applicant's I-140 spouse has an established residence in Kentucky and intends to remain in Kentucky, or B) the applicant has numerous members of his or her immediate family who have established residence in Kentucky indefinitely; or
- The applicant has been granted DACA status **and A**) is either married to a U.S. citizen who has an established residence in Kentucky and intends to remain in Kentucky, or B) has numerous members of his or her immediate family who have established residence in Kentucky indefinitely.

All decisions as to whether consideration circumstances exist in a particular application for admission shall be made by the Admissions Dean or the Dean's designee.

International students, including those with a pending application for permanent residency or with DACA status, are not eligible for most federal benefits. Therefore, if these international students are offered admission, they must submit documentation of sufficient funds to cover the cost of completing a medical degree (see estimates (<http://louisville.edu/medicine/financialaid/cost-of-attendance/>)).

The process of selecting medical school applicants involves a variety of considerations including academic, non-academic, and personal characteristics. Admission to medical school requires a strong foundation in the natural sciences (biology, chemistry, mathematics, and physics), highly developed communication skills, and a solid background in the social sciences and humanities. Specific majors are not recommended, but the undergraduate major area of study should be a careful and considered decision. All applicants to medical school must take the Medical College Admission Test. Information about the MCAT and how to apply to medical school are available at AMCAS (<https://students-residents.aamc.org/applying-medical-school/applying-medical-school-process/applying-medical-school-amcas/>). Students considering making application to the University of Louisville School of Medicine should consult the school's website (<http://louisville.edu/medicine/admissions/>) for information about their program, in addition

to contacting the College of Arts & Sciences Advising Center, (502) 852-5502, to meet with a pre-health advisor.

Pre-Optometry

Students who are planning to apply to schools of optometry can fulfill the pre-optometry course requirements at the University of Louisville. The only optometry school in the state of Kentucky is Kentucky College of Optometry at the University of Pikeville (<https://www.upike.edu/KYCO/>).

Various contract spaces made available by the Kentucky Council on Postsecondary Education (<http://cpe.ky.gov/acm/apply-cs.html>). Since schools of optometry vary somewhat in their course requirements for admission, students interested in making application should select schools to which they have an interest in applying so that they can schedule courses to meet requirements for those schools. In general, students planning to make application to schools of optometry will need a minimum of three years of college coursework including a heavy concentration in the natural sciences (biology, chemistry, mathematics, and physics) as well as courses in social sciences and humanities. Many schools of optometry give preference to students who have completed a bachelor's degree; all schools require applicants to take the Optometry Admission Test.

Students considering making application to optometry school should contact the College of Arts and Sciences Pre-Health Professions Advisors (<http://louisville.edu/artsandsciences/advising/student-services/pre-health/>) for more information. Open advising sessions are scheduled during the academic year.

Pre-Pharmacy

Students who are interested in making application to a school of pharmacy can complete prerequisite course requirements at the University of Louisville. Although requirements for admission to pharmacy schools are similar, they do vary. Students should select schools to which they are interested in applying and schedule courses to meet those requirements. The University of Kentucky College of Pharmacy and Sullivan University are the only schools in Kentucky to offer a pharmacy degree. The degree program involves a four-year professional curriculum leading to the Doctor of Pharmacy degree. Pre-Pharmacy students at the University of Louisville should consult the pharmacy school's website for the undergraduate courses required for admission to this program. Admission to pharmacy schools is competitive.

Students will need two to three years of college coursework with a heavy concentration in the natural sciences in order to meet minimum prerequisites.

All applicants must take the Pharmacy College Admission Test. Students considering making application to pharmacy school should contact the College of Arts and Sciences Pre-Health Professions Advisors (<http://louisville.edu/artsandsciences/advising/student-services/pre-health/>) for more information. Open advising sessions are scheduled during the academic year.

Pre-Veterinary Medicine

Students planning to apply to schools of veterinary medicine can fulfill pre-veterinary course requirements at the University of Louisville. Since schools may vary somewhat in their requirements, students interested in making application should select schools to which they have an interest in applying so they can schedule courses to meet requirements for those schools.

There is not a school of veterinary medicine in Kentucky. However, Kentucky does have contracts with the following schools in Alabama to

reserve spaces for students who are legal residents of Kentucky: Auburn University College of Veterinary Medicine (34 spaces; [vetmed.auburn.edu](http://www.vetmed.auburn.edu) (<http://www.vetmed.auburn.edu/>)) and Tuskegee University School of Veterinary Medicine (2 spaces; [tuskegee.edu/cvm](http://www.tuskegee.edu/cvm) (<https://www.tuskegee.edu/cvm/>)). Admission is competitive with selection made by the respective schools.

Students admitted to either the Auburn or Tuskegee program will be charged in-state tuition, with Kentucky making a payment for each enrolling student for up to four years. This is outlined by the Council on Post-Secondary Education and can be found here: cpe.ky.gov/acm/apply-cs.html (<http://cpe.ky.gov/acm/apply-cs.html>)

Students interested in making application to schools of veterinary medicine should contact the College of Arts and Sciences Pre-Health Professions Advisors (<http://louisville.edu/artsandsciences/advising/student-services/pre-health/>) for more information. Open advising sessions are scheduled during the academic year.

ANTH 348. State & Empire 3 Units**Description:** The argument: that states and empires lie at the heart of the social sciences, of the humanities, and of our everyday lives. how older empires haunt newer ones. Also emphasized: colonization and empire work as much "at home" as they do "abroad". The course is organized to keep problematical character of states and empires in our sights. It is organized, that is, to suggest that states and empires may often present where we ordinarily do not look for them.

ANTH 349. Modes of Consciousness 3 Units**Term Typically Offered:** Occasionally Offered**Description:** This course is devoted to examining how consciousness mediates between humans and the wider material world. While all of the concepts central to anthropology and the other social sciences—culture, society, evolution, history, mind, politics, economics—are premised in consciousness, the premise receives attention only sporadically. The attention that has been paid reveals that consciousness is not uniform. It has various modes. Thus the course focuses on these.

Archaeologists also use ceramics as a basis to understand the organization of ceramic production itself as an important activity. Term Typically Offered: Fall Only
Description: It is widely accepted that the first Americans came into the New World sometime before 12,000 years ago, when the earth was in an Ice Age. Beyond this, little is certain. Anthropologists use artifacts to piece together the story of who the initial colonists were, where they originated, when and how they got here, and how they adopted to their new landscape. The goal of this course is to explore the contributions of archaeology, human genetics, paleoanthropology, linguistics, vertebrate paleontology, and paleogeography in peopling of the Americas research. We will discuss how the evidence provided by these disciplines is used in the search for Ice Age Americans. In other words, how researchers use prehistoric artifacts to build ideas about the prehistory of America.

ARTH 523. History of Performance Art 3 Units

Prerequisite(s): ARTH 270 and ARTH 325; or permission of instructor; or graduate standing.

Description: History of Performance Art is designed as an advanced upper-level seminar that investigates the international, historical developments in Performance Art after World War II. It considers the experimental strategies and ideological aims of visual artists who used their bodies as the primary vehicle of expression, information, communication, and social change. Performance Art has had the dubious distinction of being the most censored art medium, and since the 1960s artists have been continually arrested and fined for their work. This is a highly significant social fact, one that draws attention to Performance Art's particularly disruptive aesthetic codes and materials-emphasizing presentation over representation; intersubjective, human bodies over inanimate objects; and temporarily over spatiality.

Description: An advanced exploratory seminar that investigates a contemporary art form as well as a thorny art-historical problem: the term "installation" now functions both as a loose descriptor for a myriad of contemporary artworks (having supplanted terms such as Assemblage and Environment) independent of medium and context, as well as a general and comprehensive art-historical genre, a circumstance that has its own compelling historical development. The course is designed so that students can grapple with a central issue for contemporary art-the definition of a burgeoning critical term for art history.

Course Attribute(s): CBL - This course includes Community-Based Learning (CBL). Students will engage in a community experience or project with an external partner in order to enhance understanding and application of academic content.

We will use an interactive discussion/seminar-style to interrogate the primary literature for current knowledge of how chemical cues influence a diverse array of ecological interactions. From the African savannas to galling insects in our own backyard. Students will have flexibility to choose their own research topics to pursue focused critical thinking and hypothesis generation. Discussions will span a range of disciplines including genetics, molecular biology, biochemistry, natural products, ecology, and evolution. Term Typically Offered: Fall, Spring, Summer
Description: A social map of the contemporary United States reveals several culturally-identified human groups based upon race, ethnicity, religion, language, family origins, and other characteristics. While diversity has become integral to the American society, it is an area that is little-studied and far less understood by many. This course will help students better understand racial and ethnic diversity in today's society. More than a historical overview, this course includes selected readings and film which provide glimpses behind the facade of the "other", to see some of the struggles they face as they become part of the American "fabric". In the process of developing this understanding, we will constantly challenge ourselves by asking two main questions: "Who is an American?" and "What does it mean to become an American?"

- PAS 247. Language, Protest and Identity - D1, SB** 3 Units
Term Typically Offered: Fall, Spring
Description: Sociolinguists see language as more than a question of people talking to each other. Language not only communicates ideas, but also communicates our identities in a society. It identifies us as we see ourselves and it identifies us, as others perceive us. Embodied in the act of human communication is a complex set of rules for how to send a message and another set of rules for how to interpret that message. Beyond these rules, socially constructed preconceptions, such as issues of race, class, and gender, can have an influence on the way people choose to communicate with others and on how that communication is understood by others. Much of this operates subtly and below our consciousness, such as when we say one thing, but our kinesics (body language) displays a different attitude. However, there are some, particularly those working in politics or advertising, who have developed a keen ability to manipulate or otherwise channel messages for a special effect. Recognizing how these various factors work, and their effect on the ability of people to understand one another, is particularly important in the current era. Societies have become more complex and diverse populations are now faced with the challenges of sharing the same living and working space. (Humanities)

Prerequisite(s): ANTH 201, or SOC 201, or SOC 202, or faculty consent.

Description: One popular story about globalization holds that human beings have been like boats all rising together on a globalizing tide. The course uses data and perspectives from across the social sciences to develop a more realistic story—one that understands that people are not boats and the tides can alternately lift them up or beat them down, refresh them or drown them depending on the circumstances. Questions about those circumstances structure the course. Another question addressed by the course: how can knowing more about globalization and in/equality help us develop the human career in different possible directions? The readings and other materials vary greatly by period, by spatical focus, and by analytical perspective. This is a WR course because the topic demands that students learn to pose their own questions about it and to answer those questions in cogent prose.

Note: Cross-listed ANTH 333.

WGST 202. Seeing Gender: Introduction to Gender in Visual Studies - D1, AH **3 Units****Term Typically Offered:** Fall, Spring

Description: This course introduces students to the disciplines of Visual Studies and Women's, Gender and Sexuality Studies. It explores the many ways in which these fields intersect through a consideration of two primary, related concepts: the social construction of vision and its inverse, the visual construction of the social. The first highlights how humans are conditioned to see the way they do because they are social animals. The latter underscores the fact that it is equally true that social arrangements, such as gender and race, take the forms that they do because humans are seeing animals. This framework allows students to critically engage some of the central questions that have shaped both Visual Studies and Women's, Gender and Sexuality Studies. How does seeing impose itself upon the social construction of gender and other forms of identity, such as racial and sexual identity? What is the relationship between images and words, and how does that relationship affect the politics of how images are used? What are the mechanisms by which vision and visual images become gendered or racialized? Why is visual experience so fraught with anxiety and fantasy? How do visual encounters with other people (and with images and objects) inform the construction of social life as gendered and racialized?

WGST 508. Queer Performance 3 Units**Term Typically Offered:** Occasionally Offered**Description:** What constitutes queer performance? Is queer who you are or what you do? Is sexuality all we mean by queer? What are the historical, aesthetic, and political aspects of queer performance? Integral to our theoretical discussions will be questions of practice and production: Where is queer performance staged and how is it received? How is it produced, for whom, by whom, and with what funds? Is queer inherently or even necessarily radical? Within rigid Western notions of gender, the "Queer Performer," is a gender outlaw; an individual who pushed at the edges of gender, forcing us to recognize that gender has little to do with our biological sex. Their performances of their gender(s), race(s), and/or sexuality(ies) challenges our prevailing notions of what it means to be Queer and what it means to perform identity. This course will examine the artistic and aesthetic performances of various Queer Performers to foster an understanding and appreciation of the rich diversity of the forms of performance styles and practitioners that might be called "lesbian," "gay," "transgender," and "queer," among others. Secondly, it will motivate students to examine the broad social, political, religious, and cultural contexts in which queer performance takes place. Lastly, this course will allow students to contemplate what it means to be a spectator of performance through a queer perspective, regardless of one's identity, or sexual orientation.**Note:** Cross-listed with WGST 608 and HUM 608.

This historical framework will be brought to bear upon the dynamics of how trauma and visuality have been approached by scientists, scholars, and artists. Each week's reading and viewing materials will offer students an example of historical or clinical account of trauma, a secondary or applied analysis, and its artist's original work that responds to the particular traumatic event under consideration. In this regard, students will be encouraged to negotiate the discursive relationships between history, theory, and practice.
